# STANDBY Flavor Amp

OUT NOW!

## “Promised paradise is a lie” - Flavor Amp goes all in on honesty with “Standby”

The new alternative rock single “Standby” combines energy and emotion. With this song, Flavor Amp presents itself from an edgy and direct side.

At its core, “Standby” explores the tension between closeness and distance — a push and pull that can feel magnetic yet destructive. It reflects the act of mentally switching off as a survival mechanism when manipulation and dependency become too much to handle.

Director Jacob Mikula ([@meaku.arts](https://www.instagram.com/meaku.arts)) captures this intense atmosphere in the song’s accompanying video, delivering striking and evocative visuals.

The song was created DIY by the band itself. In addition to the full version, there is also a radio cut.

“Standby” is an uncompromising reminder of why Flavor Amp is considered one of the most exciting rock bands from Austria: uncompromising, internationally viable - and definitely not in standby mode.
